

Center Moriches Union Free School District

Board of Education Goals 2019-2020

Facilities/Security/Technology

21st Century Learning Environments - The Board of Education is dedicated to providing the necessary resources to ensure District facilities are well maintained and promote a safe and secure 21st century learning environment. We seek to develop a long-term plan to preserve and enhance our capital assets while being mindful of the economic needs and desires of the community.

Fiscal

Fiscal and Educational Solvency in the Tax Cap Environment - The Board of Education is dedicated to the development of a stronger and deeper level of fiscal health to meet the needs of our students and the broader community of supporting taxpayers. Through short- and long-term fiscal planning, we will enhance programmatic offerings and maintain safe and environmentally sound school facilities.

Curriculum and Instruction

Students as Self-Directed Learners - The Board of Education is dedicated to supporting inquiry-based curriculum initiatives and professional development that aligns to rigorous academic standards and the social and emotional needs of all students. The District will provide opportunities for students to pursue areas of interest in academics, athletics and the arts. We seek to develop self-directed learners who are prepared to compete in a technology-driven and globally interconnected world.

Communication

Communication and Community Engagement - The Board of Education is dedicated to building trust and community support for our school system. We seek to enhance relationships by strengthening partnerships with community groups, endeavor to be self-reflective, and responsive to internal/external feedback. We commit to building upon District pride by celebrating the many accomplishments of our students and staff by engaging the school community through various mediums.

Policy

Policy Alignment to the District's Overall Mission - We pledge to operate within the District's Mission Statement, and to use this Statement, as well as our District Policy, to inform our decisions as a Board. We commit ourselves to systematic review of our policy in order to reflect on its relevance and importance in regard to our mission. This encompasses revising policy as necessary so that it better represents the current goals and values of the Center Moriches School District as an institution, as well as those of the community which we serve.

Please refer to the Administration's SMART Goals, which support and are aligned to the above Board of Education Goals. The Administration's SMART Goals are developed and implemented through a collaborative process between the BOE, administration, faculty and staff.

"Empowering ALL students to be self-directed learners through a balance of academic rigor and social, emotional learning"
