

Fall 2015 Update for Capital Project

During the Summer of 2015, the first capital project, structural repairs at the High School, was completed early and under budget. Engineering plans for the Phase 1 capital projects have recently been submitted by the District's architect to the NYS Education Department (SED). It is anticipated SED's approval will be received by early 2016. Once SED approval is received, it is anticipated that bidding for the Phase 1 capital projects will take place during the Winter of 2016. The work is currently scheduled to take place and be completed by the end of the Summer 2016.
